Welcome

Welcome to Avail ClipArt for Newton. Using the Avail ClipArt package, you will be able to browse the supplied ClipArt libraries and install selected ClipArt images for use on your Newton. Once installed, you will be able to place the images in documents that you create using the included NotepadPlus application, or any other compatible Newton application, such as AvailWorks™ from Avail Technology.

In addition to the ClipArt images themselves, two Newton applications are included for your use: the Avail ClipArt Installer™ and the Avail NotepadPlus For Newton™ application. Descriptions of each of these are provided in the following sections.

The Avail ClipArt Installer

The ClipArt Installer allows you to browse clip-art libraries on the Newton. You may also install any or all images onto your Newton, or remove any or all installed images from your Newton. Each Installer contains a different set of ClipArt images. When a ClipArt Installer application is run, it opens to the ClipArt “Browser” screen, as shown at right.

The specific range of clip-art images contained in an Installer is indicated by the title next the “Library” label. In the example at right, the “Business & Workplace” library images with names starting from “A” to “G” are available. The Avail ClipArt libraries have been segmented in this way so that very little memory is required to run any particular installer.

ClipArt Browser

The scrollbar below the displayed image can be used to scroll forward or backward through the ClipArt images. The built-in Newton up- and down-arrows may also be used to scroll through the images, if desired.

The pop-up selections at the upper-right of the displayed image allow you to control whether the image is displayed at full-size (100%) or at a reduced-size, if necessary, to fit the display area. If the image is displayed at a reduced-size, then the percentage of its full size is displayed above the image.

When the Library images are being displayed, there are two options buttons below the image area: "Install" and "Install All." Tapping "Install" will append a copy of the displayed image at the end of the Newton's set of Installed ClipArt. Similarly, tapping "Install All" will first prompt you to make sure you want to continue, and then append copies of all the images onto the set of Installed ClipArt on your Newton.

Library: √ Business & Workplace A-G
Installed ClipArt Tapping the Library selector provides a pop-up menu where you may select either the particular Library offered by this ClipArt Installer, or the Installed ClipArt already present in your Newton.

Selecting "Installed ClipArt" displays the images already installed onto your Newton, and changes the buttons below to "Remove" and "Remove All." Using these options, you may remove one or more images from you Installed ClipArt database.

Installed ClipArt Browser

You may keep as many ClipArt Installers on your Newton as desired. In most cases, you will simply put an installer onto your Newton, select any ClipArt images to install, and then remove the Installer from your Newton. Note that copies of the Images remain on your Newton until deleted with “Remove” options described later.

Also note that installing or removing copies of the ClipArt to or from your Newton does not affect the original Images that are contained in the ClipArt Installer application. The original images are always available as part of the original Installer package. As a result, you do not need to worry about “permanently deleting” ClipArt images from your Newton -- they can always be re-installed again using the appropriate Installer.

Avail NotepadPlus For Newton™

Avail NotepadPlus provides an enhanced NotePad application that enables the integration of clip-art images and features a scrolling 8 1/2 x 11 page and “What-You-See-Is-What-You-Get” page layout capabilities.

When first opened, you are presented with a blank note that has scroll-bars at the right and bottom, and a row of option buttons along the bottom of the screen.

Text and shapes may be entered just as they are in the built-in Newton Notepad application using the recognizer options buttons and keyboard button, as desired.

The text and shapes “Styles” palette may also be easily accessed by tapping the Styles button to the right of the keyboard button.

Note With Standard Text

Tapping the ClipArt Button pops-up a menu of ClipArt options. The bottom option, "Paste From Library...", produces the ClipArt Browser dialog. From this dialog, you may browse the Installed ClipArt, clear any particular image from the installed ClipArt, or Paste a copy of an image onto the current note. Tapping "Paste" also closes the browser window.

The page will then show the newly-pasted image with a gray selection border around it. At this point, you may press the pen at the center of the image and drag to reposition, or place the pen directly on the gray selection border and drag to resize the image. By default, the

Pasted ClipArt Image (Selected)

directly on the gray selection border and drag to reposition, or place the pen directly on the gray selection border and drag to resize the image. By default, the "Constrain Resize" option is checked in the ClipArt pop-up menu, so that the object remains proportional during resizing. Unchecking "Constrain Resize" allows the image to be resized disproportionately.

To de-select a selected ClipArt image, simply tap once outside the selection area, or tap once on the title area above the image. To reselect any ClipArt image, tap once on the desired image. Note that if an image is currently selected and another image is also tapped, it

will be added to the current selection. Such “multiple selections” can then be dragged or resized as a group.

Selected ClipArt images can also be cut, copied, pasted or cleared using the corresponding ClipArt pop-up menu options. Since the built-in Newton applications do not support ClipArt images, a copied image cannot be pasted outside of the NotepadPlus application.

Text and standard drawn shapes are selected using the same “highlight selection” method as used in the built-in NotePad: hold down the pen until you hear the highlight “squeak” sound, and then drag the thick highlight around the desired text or drawings. All other editing operations for these standard items are identical to the built-in Notepad application, as well.

The File button offers the standard options for assigning a note to a particular folder, and creating, deleting and renaming folders.

The Action menu offers the options shown at right.

The “New Note” option produces a new note with the title initially set to “Untitled” along with the current date and time. You may use the “Rename...” option described below to change this default name, if desired.

The “Open...”, “Rename...” and “Delete...” options all produce a dialog containing a list of all notes in the current folder, as well as the Folder Tab for navigating between folders.

The “Open...” option also offers a second option to “Open as Untitled.” This allows an existing note to be opened as a template for further modifications, while leaving the original note unchanged.

Note that the Print Note “Preview” option can be used to view a full-page preview of the particular note.

Using Avail ClipArt With Other Applications

Avail ClipArt can be used with other compatible Newton applications, such as AvailWorks for Newton™, also from PelicanWare, Inc. AvailWorks is an integrated “works” software application that combines text processing, spreadsheets, drawing, graphing and WYSIWYG page layout tools into a single Newton application. Version 2.0, or later, can also paste-in ClipArt images.

Additional applications are also being developed to take advantage of Avail ClipArt libraries. Please be sure to return your Avail ClipArt registration card so that we may keep you informed as these applications become available.

ClipArt Visual Indices

The following pages provide a “visual index” to the images contained in the five basic Avail ClipArt libraries. Most of these libraries are divided into several separate Installers for use on your Newton. The names associated with each image allow you to quickly determine which ClipArt Installer to put on your Newton to install the desired image.
